PERSOMAL SUMMARY

Highly adaptable, responsible, and aware of a multicultural working environment. My experience has enabled me to develop good organization skills. I dedicate myself to the success of the company.
I'm able to work well both on my own and in a team. I'm also good at coordinating and following up on assignments because there is always room for self-improvement. I believe that my knowledge, experience, design thinking, and proficiency fit well with the job description and requirements.

EDUCATION

- 2021 - 2024
  Major Statistical Information and Data Science at Khon Kaen University. (GPA : 3.37)
- 2018 - 2021
  Graduated from seconadry school in Mathematics-Science program at Sakolraj Wittayanukul School.

WORKING EXPERIENCE

- August 2022 - I participated in a two-day activity at MINI R2M #10, which allowed me to gain deeper knowledge of research to market and to develop the necessary skills for solution fit and design thinking. Because MINI R2M #10 is a project to create a new startup, I had the opportunity to use design thinking on a daily basis with startup staff and teammates, which has greatly improved my command of design thinking.

- August 2023 - Science Day activities set up a science day booth, devise activities, and design internal activities. Participate in activities with those interested in participating. Make a performance evaluation. After completing the activity, it gave me social skills. Skills in working together with others and being responsible.

- April–June 2024 - Internship at the Human Resources Department gets to work on documents. Check employee information using Microsoft Excel and Pythons. Edit information. Change positions. Salary changes cancellation of various orders by employees using Microsoft Word.

- November–March 2024 Cooperative education at MSIG Insurance (Thailand) PCL has organized a project called Developing a Travel Insurance Fraud Monitoring Dashboard that leverages BigQuery to connect datasets with Looker Studio and write SQL queries for data cleaning and preparation, manage documents, summarize work to reduce the working time of seniors in the department, organize documents of contracted hospitals, summarize documents, and join project meetings of the department.

Programming Languages	Python	SQL	
Computer Program	Microsoft office	Canva	SPSS
	Looker studio	Power BI
